MTB Managing El Galeno Project In Northern Peru

GREENWOOD VILLAGE, Colo. – MTB Project Management Professionals Inc. is managing completion of a comprehensive feasibility study and economic assessment for the Galeno copper-molybdenum project in northern Peru. Pending the anticipated positive result of the feasibility study, engineering, procurement and construction of the project is planned to begin in 2009.

The Galeno Project is located in the Cajamarca region, a mineral-rich area of the Peruvian Andes. The project has been developed by Northern Peru Copper Corporation (NPCC) of Vancouver, British Columbia, and was recently purchased from NPCC by the Chinese company China Minmetals. Previously, MTB had completed positive scoping and prefeasibility studies, as well as corresponding Canadian National Instrument 43-101 economic assessment reports, for the project.

As project managers for the feasibility study, MTB's scope includes overseeing feasibility-level information gathering, engineering, and cost estimating; managing completion of the report; and ensuring that all work is completed on time and within budget.
